

FORTUNE OKERE

Birmingham, UK B24 - 8AQ. | +447350154514 | f.okere@my.bpp.com

PROFESSIONAL SUMMARY

Experienced Highway Construction and Civil Engineering Professional with over 8 years of practical experience in highway construction, railway infrastructure projects, drainage systems, groundwork, site setting out, and maintenance operations. Skilled in interpreting engineering drawings, conducting site measurements, supervising construction activities, and ensuring compliance with health and safety regulations. Possesses strong technical knowledge of civil engineering principles and proficiency in Autodesk design software. Holds a BSc in Architecture and Construction Engineering and an MSc in Project Management.

CERTIFICATION

- Construction Site Safety Awareness
- Risk Assessment and Method Statements (RAMS)
- Manual Handling
- PPE Compliance
- Environmental Management
- First Aid at Work
- Temporary Works Awareness
- NRSWA Street Works Qualification

WORK EXPERIENCE

2025-2026

ARCHITECT/SITE SUPERVISOR
"ANO'S INDEXES

- Monitor daily site operations and construction activities.
- Identify defects, non-compliant work, and construction errors.
- Ensure the finished building matches the architectural intent.
- Liaise between clients, engineers, contractors, and local authorities.
- Track project schedules and milestones.
- Verify that work progresses according to the construction programme.
- Maintain site records, inspection reports, and meeting minutes.
- Coordinate with structural, mechanical, and electrical engineers to resolve technical issues.

2020-2025

MAINTENANCE AND CONSTRUCTION
HIGHWAY CONSTRUCTION WORKER

- Preparing construction sites by clearing land and setting up equipment.
- Operating machinery such as excavators, rollers, and bulldozers.
- Laying asphalt, concrete, and road foundations.
- Installing road signs, barriers, drainage systems, and guardrails.
- Measuring and marking work areas according to plans and specifications.
- Following safety procedures to protect workers and road users.

2015-2020

NIGERIA MINISTRY OF WORKS
RAILWAY MAINTENANCE AND CONSTRUCTION WORKER

- Preparing sites for railway track installation.
- Laying rails, sleepers (ties), and ballast.
- Installing switches, crossings, and signaling equipment.
- Operating construction and maintenance machinery.
- Inspecting tracks and identifying defects or damage.
- Repairing and replacing worn or damaged track components.
- Ensuring railway construction meets engineering and safety standards.
- Working with engineers and other specialists during railway projects.

EDUCATION

2026	MSC, PROJECT MANAGEMENT BPP University Manchester, United Kingdom
2015	BSC ARCHITECTURE Abia State University, Uturu

SKILLS

- Autodesk AutoCAD
 - Autodesk Civil 3D
 - Site Surveying and Setting Out
 - Construction Drawing Interpretation
 - Quantity Measurement
- Project Planning and Scheduling
 - Microsoft Project
 - Microsoft Excel
 - Quality Control Procedures

KEY ACHIEVEMENT

- Contributed to successful highway maintenance and infrastructure improvement projects.
- Supported the delivery of civil engineering works with a strong focus on quality and safety.
- Assisted in completing drainage and groundwork projects within scheduled timelines.
